

STRONG TECHNOLOGIES.. ONE BRAND.

Weißensberg, 12.12.2024

RAUSCH. A strong brand for innovative technologies in the TV inspection and sewer rehabilitation industry. With immediate effect, the Rausch, minCam and Rausch-Rehab brands will be managed under the uniform RAUSCH brand. This reflects the group's commitment to offering its customers a clearly understandable range of multifunctional technologies from a single source.

The companies operating under the RAUSCH umbrella are leaders in the development and production of innovative products in the fields of TV inspection systems and leak testing systems, milling robots and UV technology for liners for optical pipe and sewer inspection as well as for trenchless sewer rehabilitation. The aim of the perfectly coordinated technologies and products is to protect the most valuable infrastructure - the wastewater network - to maintain its function and to prevent damage to the environment and people.

From the smallest pushing system to carriage systems and robotics through to UV systems, integrated technology solutions are provided for all requirements. The integration of the most diverse tasks from the market ensures optimum coordination of the product lines. This provides customers with comprehensive, modular systems and increased efficiency in their projects.

This standardization will help to further strengthen the RAUSCH brand and expand its market position as a leading provider of TV inspection and sewer rehabilitation systems. Customers will benefit from improved brand awareness and the certainty that they will receive all the solutions they need from a single source.

New brand identity: Clear focus in communication communication and product design

Intuitive navigation: Inspection systems, sliding systems, robotics and UV systems
